GitHub: github.com/wasupon0

Frontend Engineer based in Tokyo with 5 years of experience building complex B2B SaaS interfaces, data-rich business tools, and geospatial applications. Committed to clean code, frontend best practices, and continuous learning.

SKILLS

Frontend: React, Next.js, JavaScript, TypeScript, shadcn/ui, Tailwind CSS, Vite, Playwright, Vitest, Figma

WORK EXPERIENCE

Evolany Co., Ltd. | エボラニ株式会社

Frontend Engineer

November 2024 – Present

- Developed frontend features for anybot, a low-code **LINE chatbot** and **miniapp** builder. Including bot editor enhancements, UI fixes, JA/EN/TH **localization**, **webhook relay integration** for Thailand AWS environment, form autocomplete, gps-based stamp collection, and miniapp widget customization using **JavaScript** and **PHP**.
- Migrated the company's business system to **React** and redesigned its UI components with shadcn. Managing state using **React Context** across **SaaS metrics** dashboard, lead tracking, billing, and **agile** project workflows.
- Improved release quality by writing **Vitest** unit tests and implementing UI, integration, E2E, and regression tests with **Playwright**. Collaborated with Sales, Product, and Customer Success to improve workflows and usability.

Fujitsu Limited | 富士通株式会社

Software Engineer

April 2023 – October 2024

- Contributed to the release of Fujitsu Enterprise Postgres, a cloud database running on Kubernetes. Enhanced database features such as disaster recovery, backup, and restore using the Ansible Operator and bash scripting.
- Maintained bash-based regression test automation, addressed Red Hat vulnerability findings, and validated Fujitsu Enterprise Postgres container images and its OpenShift Operator before publishing them to the Red Hat Catalog.

Iwane Laboratories, Ltd.

Application Engineer

October 2020 – March 2023

- Developed map tools on websites and mobile app such as markers, tags, annotations, gps location, and dynamic map tiles using **Leaflet.js** and **OpenLayers**. Integrated 3D spherical views and measurement tools with **Three.js**.
- Built a complex, interactive map website using **REST APIs** and maintained a GeoServer-based mapping stack, managing Web Map Service (WMS) layers and **geospatial** data stored in **PostgreSQL** with PostGIS extension.
